

REDISCOVERING ATLANTIS

Imagine that Atlantis, supposedly submerged in the Atlantic Ocean, rises to the surface and becomes livable. Mountains and valleys grow rich with plants and animals. Atlantis returns as a land of plenty where anything is possible.

You are chosen to lead the first expedition into the new land and must choose the members of the expedition. Your colony will be totally self-sufficient and you will have no contact with other people for two years.

Think about the type of society you would like to establish and the needs of your colony. Then study the list of applicants below. In choosing the people to accompany you, follow these two rules:

1. You can only take 15 people - one from each box.
2. There must be an equal number of men and women (include yourself for a total of 8 men and 8 women)

Study the table below, write down your choices, and your reasons for each selection you make such as: age, sex of applicant, skills or professional capabilities:

Consumer & Homemaking

Nutrition expert: Sally, 42
Tailor: Cliff, 28
Cook: Patty, 18

Marketing & Distribution

Warehouse controller: Tom, 35
Efficiency expert: Carol, 24
Salesman: Ed, 19

Manufacturing

Draftsman: Christine, 19
Machinist: Zack, 30
