

TEACHER'S NOTES

RECYCLING-THINK BEFORE YOU THROW!

JUST ENGLISH EXPLORER VOL. 12 ISSUE 3
CRAZY FOR K-POP!

ELEMENTARY (A2)

ENVIRONMENTAL REPORT

EXERCISE 1

Fill in the blanks with the words in the box. Read the article for hints.

1. Part of recycling is reusing.
2. To recycle, start by sorting your garbage.
3. Old paper is crushed into pulp and cleaned, and then flattened out to make new paper.
4. Melted glass can be shaped into new glass bottles, glass cups and glass plates.
5. Recycling can also stop garbage from spoiling our environment.

6. Objects made from plastic take a long time to break down.
7. Garbage must be sorted, or else it will not be taken by the garbage man.
8. By drinking polluted water, we can fall sick.
9. Garbage that is not recycled is usually sent to landfills.

LEARNING ACTIVITY

Identify the waste that should be placed in these bins based on colour alone. Make a list of common household garbage that should be placed in each.

Blue bin

Usage: **Paper.**

Covers, coloured and plain paper for example newspapers, magazines, books, catalogue sheets, brochures, calendars, cards, envelopes, and cardboard boxes.

Brown bin

Usage: **Glass.**

All coloured and non-coloured glass such as soft drink bottles, food containers, medicine bottles, and cosmetic containers.

Orange bin

Usage: **Plastic and Aluminium.**

Includes aluminium and steel tins.

All coloured and non-coloured tins, shopping bags, canned drinks, mineral water bottles, food containers, detergent bottles, vitamin bottles. Nothing toxic such as paint cans.
